08/21/2017	2.0	Corrected variable names FormVersion to RFQ_FormVersion to

Notes:

Variable names from InfoPath were retained as final variable names in the source file and analytic files with the exception of the variable FormVersion which was updated to the RFQ_FormVersion to differentiate from the same variable on other study forms.

The consolidated date variables (example:[InterviewDate]) are character variables in the form of 'yyyy/mm/dd'

For some Yes/No questions where 1=Yes and 2=No, 9=Don't know is not printed, but was coded

If multiple responses were received, then new combination codes were created.

Example: "A11. Main type of flooring in home" printed responses are 1=Dirt, 2=Cement, 3=Ceramic Tile, 4=Terrazzo, 5=Wool carpet, 6=Other, 9=Don't know
Combination code=23 would mean both cement and ceramic tile reported
Combination code=346 would mean tile, terrazzo and other reported

Questions about each pregnancy begins on pages 6-7 for pregnancies 1 to 6 and continues on pages 34-35 for pregnancies 7 to 12. Questions about pregnancies 13 to 18 were also asked, but the pages are not included on this form.
