Revision History

Date	Version	Revisions
05/01/2013	1.0	Annotated form with variable names
10/22/2016	1.1	Added note about consolidated date variables
10/27/2016	2.0	Added the version 2 response options in Q5 and added Q15
08/21/2017	3.0	Updated the variable names from the InfoPath names to the final Source File variable names

Notes:

In the final source file, the variable names were updated to include the preface "BP_" needed to differentiate from the same variable names in other forms when creating analytic files. The original InfoPath variable names were the same but without the "BP_" prefix. For example, variable BP_Q1 is Q1 in the corresponding InfoPath form.

Because there can be up to three biopsy forms completed per participant, the source file variable names include 'F1' for the first biopsy form, 'F2' for the second biopsy form, and 'F3' for the third biopsy form. To avoid unnecessary redundancy on the Annotated Form, these are denoted as 'Fx' where x will be 1, 2, or 3 in the variable name depending on which biopsy form it is.

The consolidated date variables (example: [BP_Q6Date_Fx]) are character variables in the form of 'yyyy/mm/dd'
