Revision History

Date	Version	Revisions
05/01/2013	1.0	Annotated form with variable names
10/22/2016	1.1	Added note about consolidated dates, added [StudyStaffID]
08/21/2017	2.0	Updated the variable names from the InfoPath names to the final Source File variable names

Notes:

In the final source file, the variable names were updated to include the preface "SV_" needed to differentiate from the same variable names in other forms when creating analytic files. The original InfoPath variable names were the same but without the "SV_" prefix. For example, variable SV_Q1 is Q1 in the corresponding InfoPath form.

The consolidated date variables (example: **[SV_CDate]**) are character variables in the form of 'yyyy/mm/dd'

A small number of PLH cases had a second saliva sample collected. We retained the second saliva sample as the primary saliva sample for the study because it corresponds in time to the blood sample. The original saliva sample was also retained and the corresponding data are prefaced by SV2_ rather than SV.
